NAVYA KRALETI

QUALITY ASSURANCE ENGINEER

(+971) 506977870 | navyakraleti346@gmail.com | LinkedIn | GitHub | Portfolio | Dubai, UAE | Sponsored Visa | Immediate Joiner

SUMMARY

4+ years of experience in QA delivering high-quality enterprise applications through a balanced mix of manual and automation testing. Experienced in Salesforce platform testing, Playwright (JavaScript) automation, API validation, and SQL-based backend verification, with a strong track record of improving test coverage and ensuring stable releases in Agile environments.

SKILLS

- **QA Strategy & Manual Testing**: Test Planning, Test Case Design, Functional Testing, Regression Testing, Integration Testing, UAT, End-to-End Validation
- **Automation & Tools**: Playwright (JavaScript), Node.js, Automation Framework Development, Page Object Model, Data-Driven Testing
- **API & Backend Validation**: API Testing (Postman), REST Validation, SQL, Data Validation, Backend Verification
- **Enterprise & Platform Testing**: Salesforce Testing, Enterprise Workflow Validation, Release Validation, Risk-Based Testing
- **Defect & Delivery Management**: JIRA, Azure DevOps, Defect Lifecycle Management, Root Cause Analysis
- **Process & Collaboration**: SDLC, STLC, Agile/Scrum, CI/CD Exposure, Git/GitHub, Cross-Functional Collaboration

EXPERIENCE

Quality Assurance Engineer

Infosys Limited, India — Aug 2021 - Sep 2025

- Designed and executed end-to-end QA strategy combining manual validation and automation to improve release reliability.
- Created detailed test plans, test cases, and validation scenarios aligned with SDLC/STLC practices.
- Executed 350+ functional, regression, integration, smoke, and UAT test cases across enterprise platforms.
- Built and maintained Playwright-based automation frameworks using JavaScript, reducing regression effort by 40%.
- Developed reusable automation components to improve framework scalability and automation coverage.
- Performed API testing and backend data validation using Postman and SQL to ensure stable system integrations.
- Logged and managed 500+ defects via JIRA and Azure DevOps, supporting triage and faster issue resolution.
- Collaborated with developers, business analysts, and product owners within Agile squads to deliver high-quality releases.

QA PROJECTS

- Novartis – Enterprise Platform Testing (Salesforce & Cloud): Executed end-to-end testing covering functional, regression, integration, and UAT scenarios across enterprise workflows; validated backend data flow and system integrations to ensure release stability.
  GitHub: https://github.com/NavyaKraleti/Novartis
- Stryker – Data Analytics & Integration Testing Platform: Performed SQL-based data validation and integration testing across multi-layer data pipelines; ensured data consistency, accuracy, and quality across interconnected systems.
  GitHub: https://github.com/NavyaKraleti/Stryker
- Playwright Automation Framework (JavaScript): Built scalable Playwright automation framework using Page Object Model and data-driven testing; automated end-to-end user journeys and regression scenarios with CI-ready structure.

EDUCATION

MBA In Information Systems (Online) Jun 2024 – Present (Expected Jul 2026)
Manipal Academy of Higher Education, India - GPA: 9.6 / 10

Bachelor of Computer Applications (BCA) Jul 2018 – Jul 2021
Andhra University, India - GPA: 8.5 / 10

CERTIFICATIONS

- Tosca Automation Specialist (AS1, AS2) & Deep Dive (AE1, TDS1) – Tricentis
- AWS Certified Cloud Practitioner – Amazon Web Services
- Certified Global Agile Developer – Infosys
